

# CGI's PM Suite maintains all aspects of the business for major Canadian Oil and Gas Client

A major oil and gas client needed a solution to cover all aspects of daily production, field level swing of production to multiple plants and needed to adhere to corporate level reporting requirements. CGI provided a cost effective solution, knowledgeable support staff, worked with client to build the Heavy Oil functionality to accommodate the business needs.

## Solution Benefits

- PVR delivered the ability to maintain all aspects of the business, Oil, Gas, Heavy Oil. Plant maintenance and capture of physical data at plant level using GFR
- Ability to schedule all imports and exports for Corporate reporting and partner required data.
- Ability to maintain regulatory reporting through the FFV module.

*“When we upgraded to the latest version of the PM Suite, CGI was very accommodating to our needs as issues came up to provide a quick solution and turn around.”*
